

# Soybeans

Stage	Dosage (l/ha)	Application	Number of Applications	Outcome
Seed treatment	2 - 3 l/ton	Seed treatment with just Afrikelp or in combination with any fungicide or fertilizer.	1	Improve germination and root development.
V3 - V5 stage	2	Foliar spray between V3 and V5 growth stage.	1	Improve plant growth.
Reproductive (R1 - R2)	2	Foliar spray before and/or during flowering stage.	1 - 2	Improve pod filling and yield.

All recommendations are based on field experience and trial results worldwide. Genetics by environment (G X E) must be considered in all applications as this has an impact on plant growth and production. Please contact your local supplier/advisor for additional technical assistance. Each recommendation should be adapted to local conditions and/or optimised depending on crop varieties, soil, environment and fertilisation programs.
